

Resource Governance in Asia Pacific

for Energy Security, Welfare, And Sustainability

Training Course – Batch 3
19 – 31 October, 2015

**Training Course
Batch 3
19-31 October 2015**

Course Content
The Course is divided into five parts :

1
Socio-environmental impact

2
Tax, Royalty and Contract Terms

3
Revenue Management

4
Expanding disclosure requirements of the
Extractive Industries Transparency Initiative (EITI)

5
Coalition for Reform

1. Social & Environmental Impacts

A comprehensive understanding on socio-environmental impact of extractive industries is needed for all actors including the industry players, government officials, civil society activists, journalists, researchers and academic staff for more productive engagement and better management of the sector. This course aims for participants to gain a thorough understanding on the social and environmental risks associated with extractive industries. It is expected that through this course participants will better appreciate the unique bio-physical characteristics of the region and the social issues related to the use of natural resources. This program also aims to provide capacity for the implementation of meaningful and effective Environmental Impact Assessment (EIA), Free Prior Informed Consent (FPIC), and other similar process. As part of this course participants will also develop skills and capacity to manage or mitigate social and environmental risks and estimate economic benefits following the operation of an extractive industry project.

After completing the course, the participants are expected to have developed their capacities in five key areas : first, to become sufficiently acquainted with EI operations and their associated risks; second, to undertake EIA and FPIC processes more effectively and to acquire broader forms of assessments; third, to perform natural resources valuation vs. economic gains estimated through financial modeling; fourth, to gain knowledge about international EI standards and its potential application in the region; fifth, to comprehend how to undertake constructive engagement in this issue.

2. Tax, Royalty and Contract Terms

In order to endorse transparency and accountability on extractive industries, a good understanding on fiscal regimes is important so that participants better understand the terms governing the flow of revenue. This course will provide a strong background on the financial rules included in contract and legislation that set payment obligations and the interaction among various elements of the extractives industry legal system.

This course will be divided into 5 sessions. First, introduction to legal hierarchy/key contract forms and terms. Second, fiscal systems and key terms that will enlighten the participants on differentiating major revenue stream such as royalty, production share, state equity, and income taxes. Third, pitfalls and loopholes, which will enrich participant's understanding on managing possible risks associated with revenue shortfalls. Fourth, the financial modeling which describes how to assess potential returns under a hypothetical fiscal scenario to enable stronger analysis of fiscal terms. And the last one is monitoring of fiscal obligations.

Participants will undertake a simple modeling exercise delivered by the trainers. After the course, participants are expected to advocate and strengthen their own institutions with their knowledge and skills.

3. Revenue Management

This session will provide overview of challenges in managing natural resources revenues. This also will include relations between fiscal policies, governance and institutional settings established to manage revenues. The three-day session on revenue management will enhance participant's analytical skills through assessment of case studies, identifying challenges and issues individually as well as in group. Case studies will be taken from countries in the region such as Indonesia, Timor Leste, Philippines, Myanmar, Vietnam, Malaysia, and relevant cases from other countries such as Norway, Peru, Ghana, Azerbaijan, etc. In this session country groups will be formed to apply their analytical skill to their own countries.

4. Expanding Disclosure Requirements of the Extractive Industries Transparency Initiatives (EITI)

As of May 2013, the EITI standard has made significant shift from its initial focus on transparency of payment transactions to address much broader range of governance challenges in the extractives industries. This enhanced scope requires both EITI implementing countries and candidate countries to rethink about the opportunities that EITI new standard offers for improving the governance of extractive industries in their countries. Also at the same time the new EITI standard will help participants diagnose key governance challenges facing their countries.

This course will also include sharing experience from EITI implementing countries in the region such as Indonesia, Myanmar, and the Philippines. It is expected that by the end of this course participants will have better understanding on how to use the new EITI standard as a tool to promote reform and improve governance of extractive industries in their own countries.

5. Building Coalition for Reform

Strategy in policy advocacy is the main learning objectives in this session especially creating the links between accountability actors such as CSO's activists, journalists and the policy makers. Upon completing this course, participants will have the ability to create clear message of advocacy, perform stakeholder mapping analysis, decide on approaches to get public support, and able to use reliable data and research to support advocacy. These skills will be integrated into each EI value chain. This session will be delivered in three combined ways : lecturing, group discussions and group exercise. It will be facilitated by experienced trainers.

Course Methods

The course will include interactive lectures by leading experts, focused group discussion, practical exercises, a field trip, and mentoring class for the post training period. Every session will be delivered by combining theoretical and general concepts as well as instrumental and practical techniques including knowledge and experience sharing among participants.

Course Structures and Dates

Course participants have ten day face to face interaction in a classroom setting as well as receiving coursework assignment from the conveners and also there will be a two day field trip. All those activities will be delivered by qualified mentors. The course will be held from 19-31 October 2015.

Course Venue

The course is held at the Faculty of Social and Political Sciences, Universitas Gadjah Mada, Yogyakarta, Indonesia.

Program Itinerary

DATE	ACTIVITY	NOTES
18 October 2015	Arrival for all participant	Jogjakarta Plaza Hotel

SAW PAUL SEIN TWA is the executive director and co-founder of the Karen Environmental and Social Action Network (KESAN), a community-based grassroots organization working alongside Indigenous Karen communities in Burma. Paul has been working on social and environmental issues in Burma's conflict areas since 1996. Since KESAN's founding in 2001, he has built it into a widely-respected organization collaborating closely with local communities to deliver practical, substantive and empowering community development solutions to large numbers of people in remote areas affected by one of the world's longest-running conflicts.

As the leading spokesperson for KESAN and several networks of border-based organizations including Karen Rivers Watch (KRW), Burma Environmental Working Group (BEWG) and Karen Peace Support Network (KPSN), Paul advocates for sustainable socioeconomic development solutions. Under Paul's direction, KESAN has become an effective force working to improve governance of Burma's lands, waters, forests, and natural resources, while promoting community-determined development in the context of ethnic peoples' vision of durable peace and genuine well-being.

Prior to joining Natural Resource Governance Institute, Wissem Heni worked in a number of relevant departments within the Tunisian government, namely the ministry of interior and the prime ministry office. Most notably, he was part of the Hydrocarbon and the Mining Advisory Commissions, which provide consultation and technical advice to the Ministry of Industry prior to signing licenses with international oil companies. As deputy director of Legal Assistance Services within the prime ministry office focused on extractives, he put to use his extensive knowledge of the sector to monitor the legality of hydrocarbon and mining permits and licenses. Besides having built strong relations with key actors in the hydrocarbon sector, he worked closely with the Ministry of Industry on the interpretation of Article 13 of the constitution. Wissem holds a Bachelor's Degree in Law from Tunis and a Masters in Administration. He also received trainings on sustainable development, anti-corruption, and bilateral investment treaties. At NRGi, he is supporting the implementation of NRGi's engagement in Tunisia by providing capacity development, technical assistance and project management support to the program sector. He is focusing mainly on official stakeholders (government and parliament).

Andrew is an economic analyst at the NRGi. Prior to joining, he served on Canada's G7/8 and G-20 teams as an international economist at the Department of Finance, where he provided economic policy advice and participated in the planning and execution of the G8 and G-20 Summits as well as preparatory finance ministerial during Canada's host year. He has held positions in government, non-profits and the private sector, having worked for Debt Relief International, UNICEF-Canada, Transparency International-Kenya, and the Commission on Human Rights and Administrative Justice (CHRAJ-Ghana), among others.

At NRGi, Andrew focuses on economic technical assistance and research to improve natural resource revenue management. His work includes advising governments and civil society on macroeconomic management, governance and accountability mechanisms, and local content in the extractives.

Andrew holds a M.Sc. in Economics for Development from Oxford University, where he won a thesis distinction for his work on the monetary transmission mechanism in Tanzania. He also received a B.A. in Economics and International Development Studies from McGill University. Never at rest, Andrew still liked to go home for a regular dose of Montreal bagels and to cheer on the Canadians.

Jelson is NRGi's senior-most representative in the Asia-Pacific region, focusing on Indonesia, Myanmar, the Philippines, Timor-Leste and Vietnam, and is responsible for potential engagement in additional countries such as China and India.

Before NRGi, Jelson served as Asia program director for the Bank Information Center, where he was responsible for the strategic programming and staff operations in Southeast Asia, South Asia, and Mongolia, and program representation in Washington, DC. In this capacity, he aligned BIC's country and regional strategies with the global and cross cutting-programs such as the collective movements for robust environmental and social safeguards, accountability mechanisms, transparency policies, energy strategies, and the private sector lending standards of the World Bank Group, the Asian Development Bank and other IFIs. He also worked with communities and civil society organizations to bolster their campaigns for human rights protection, accountability and reconsideration of coal, mining, land reform, water, airport and high-risk energy infrastructure projects, and stronger safeguard requirements in financial intermediary lending and new forms of financing from IFIs.

Jelson has 18 years of on-the-ground, regional and international experience managing research, policy advocacy, problem project campaigns, training and community development in the fields of natural resource governance, development and climate finance, peacebuilding, agrarian reform and rural development. Jelson holds a B.A. in anthropology and comparative sociology from Macquarie University, and a masters degree in anthropology from the University of the Philippines. He serves on the board of directors of Earthrights International and advises several advocacy groups in Asia.

Jelson Garcia

Natural Resource Governance Institute (NRGI) – Asia Pacific Director

Before joining the Natural Resource Governance Institute Emanuel served as the Regional Program Manager on Governance for Southeast Asia with CAFOD, where he led the overall development and implementation of CAFOD's regional governance program, ensuring that advocacy strategies fed into and were informed by global policy advancements, providing technical advice on regional and country strategies and identifying emerging policy issues and trends. His most recent former posts included a fellowship on global governance and climate policy at Freidrich Ebert Stiftung, Program Advisor and Coordinator for the European Commission Program of the Luta Hamutuk Institute in Timor Leste, where he provided technical advice, produced policy briefs and delivered trainings related to oil and gas revenues and budget transparency. His prior work experience with Habitat for Humanity in Indonesia and Timor Leste included specific work on planning, design, monitoring and evaluation. Before that he undertook socioeconomic impact assessments on communities affected by Asian Development Bank funded projects in Indonesia.

Emanuel joined NRGi in October 2013 to specifically oversee the development of our Asia Pacific Regional Training Hub, our partnership with the Indonesia Parliamentary Center to support national advocacy and regional training to advance good governance in the extractives, and our partnership with the Institute for Essential Services Reform on our ASEAN regional advocacy.

Emanuel holds a bachelor's degree from the Driyarkara School of Philosophy in Jakarta, Indonesia and has taken post graduate courses on leadership and strategic management at Cornell University. He is fluent in Bahasa Indonesia and Tetun, and also speaks Portuguese, Spanish and Khmer.

Emanuel Bria

Natural Resource Governance Institute (NRGI) - Asia Pacific Senior Officer

Abdul Gaffar Karim is an University lecturer in Intermediary Studies, Civil Society studies, Multiculturalism and Democracy studies as well as researcher at Department of Politics and Government in Universitas Gadjah Mada for about ten years. He has strong research experiences, both with International and National organizations such as International IDEA, Australia Aid, The Royal Norwegian Embassy, Agder University College, International Republican Institute (IRI), National Development Planning Agency, Tifa Foundation, Lombok Timur Regency, North Maluku Province, and also The Asia Foundation.

He currently serves as the Head of Undergraduate Program. Prior to that, he was the Director of Research Centre for Politics and Government (PolGov) for about two years. He holds degrees from Department of Government, Universitas Gadjah Mada and Department of English in Universitas Airlangga, a MA from Department of Asian Studies and Languages, in the Flinders University of South Australia

Joash Tapiheru
A researcher

Joash is a researcher at RegINA-PolGov since 2013. He concerns on public policy, democratization and decentralization, and Human Right. He holds bachelor degree from Department of Politics and Government, Universitas Gadjah Mada in Political Science and master degree on Human Right and Democratization from the University of Sydney, Australia.

Wigke Capri Arti
Researcher

Wigke is a researcher at PolGov for more than five years. With a concern on minority right, social movement, governance, and decentralization, she already has published a book on tracing gay movement in Yogyakarta and several journals as well. Prior her role with PolGov, she worked as a reporter on magazine and newspaper in Jakarta then moved to Yogyakarta and became researcher in Centre for Policy and Population (CPPS) in Universitas Gadjah Mada.

Hening Kartika Nudya
Researcher

Hening Kartika Nudya is a junior researcher at RegINA-PolGov. She holds bachelor degrees from Department of Politics and Government, Universitas Gadjah Mada. She involves in vibrant youth movement for anti-corruption. Her prior works served as research assistant at Center for Economic Democracy Study, Universitas Gadjah Mada (2012-2013). She is presently deepening her capabilities on researches, focusing on citizenship in resource rich area, particularly in Manggarai, East Nusa Tenggara Province, Indonesia.

Prior to her work with RegINA-Polgov, she served a researcher at Research Department, Kompas Daily Newspaper. She concerns on social development and urban management. She holds bachelor degree from Department Sociology, Universitas Gadjah Mada and master degree on urban social development from the Institute for Housing and Urban Development Studies (IHS)-Erasmus University, The Netherlands.

Indah Surya Wardhani
Knowledge
Management Officer

Dhani is a last-year student in Department of Politics and Government, Universitas Gadjah Mada. He has a strong interest for doing social research and started his step as an enumerator by ASEAN Studies Centre Fisipol UGM in 2013. By the end of 2014, he was joining with ARuPA (Aliansi Relawan untuk Penyelamatan Alam) – NGO who has concern about saving nature – and conducting research in order to create masterplan of community empowerment in Banyuwangi, East Java. In the midst of 2015 he presented his paper about the social impact of globalization and massive development in academic conference in Bangkok, Thailand. He is currently taking internship programme in PolGov UGM since July 2015 and being part of Resource Governance in Asia Pasific (RegINA) working group.

A. Dhani Darmawan
Internship

Deasy Kumalasari Dewi is an undergraduate student in department of Politics and Government, Universitas Gadjah Mada. She is currently working on her undergraduate thesis themed in local government capacity. Nevertheless, she also has a special interest on the politics and military topic which she intends to do a further research in the future. She is eager to serve her country as a diplomat or—in her plan B—as a news anchor. However, she started to gain a new interest on the resource politics since taking the internship programme in Research Center of Politics and Government. She is committed to do some voluntary works such as helping children who live at Gajah Wong Riverbank to study.

Deasy Kumalasari D.
Internship

Lintang is a student of Undergraduate Programs in Departement of Politics and Government, Universitas Gadjah Mada and now doing her undergraduate thesis. She actively involve in social organization, such as Muhammadiyah – an Islamic organization which has much concerns not only in religious matter, but also in social matters – to fulfil her interest. She loves exploring something new, such as new culture, new language, new social-life, which made her dare to explore Natuna Island – the northeast island of Indonesia – in 2 months and now ready to explore anywhere else. Now, she gains new interest in resource politics since taking internship progamme in PolGov UGM start from August 2015 and also being part of Asia Pasific Knowledge Hub (ASPAC) working group.

Fieldtrip to Bojonegoro and Tuban

“Improving the Governance of Extractive Industries”

Tuesday, October 20

13:00	Depart from Yogyakarta
20:00	Arrival at Bupati Bojonegoro Residency
20:00 – 22:00	Dinner with Bupati Kabupaten Bojonegoro

Wednesday, October 21

08:30 – 11:30	Depart to ExxonMobile Cepu Limited
11:30 – 12:30	Lunch
13:00 – 15:00	Discussion with Bojonegoro Local Government (Group A)
13:00 – 15:00	Discussion with Member Parliament (Group B)
15:00 – 18:00	Discussion with Campuhrejo Community (Group B)
15:00 – 18:00	Discussion with Mojodhelik Community (Group A)
18:00 – 19:00	Dinner with local community
19:00 - ...	Free Time

Thursday, October 22

07:00 – 08:00	Breakfast
08:00 – 09:00	Sharing and Reflection
09:00 – 12:30	Bojonegoro to Solo
12:30 – 13:30	Lunch
13:30 – 15:30	Solo to Yogyakarta
15:30 – 16:30	Evening at Candi Plaosan
16:30 – 17.30	Candi Plaosan to Hotel
17:30 –	Check In and Free Time

ASPACHUB 2015 : Cultural & Sport Program

25 Oct, 12.00 – 15.00

Practice to make your handmade Batik

26&29 Oct, 07.00 – 08.00

Sport and Games at JPH PlayGrounds

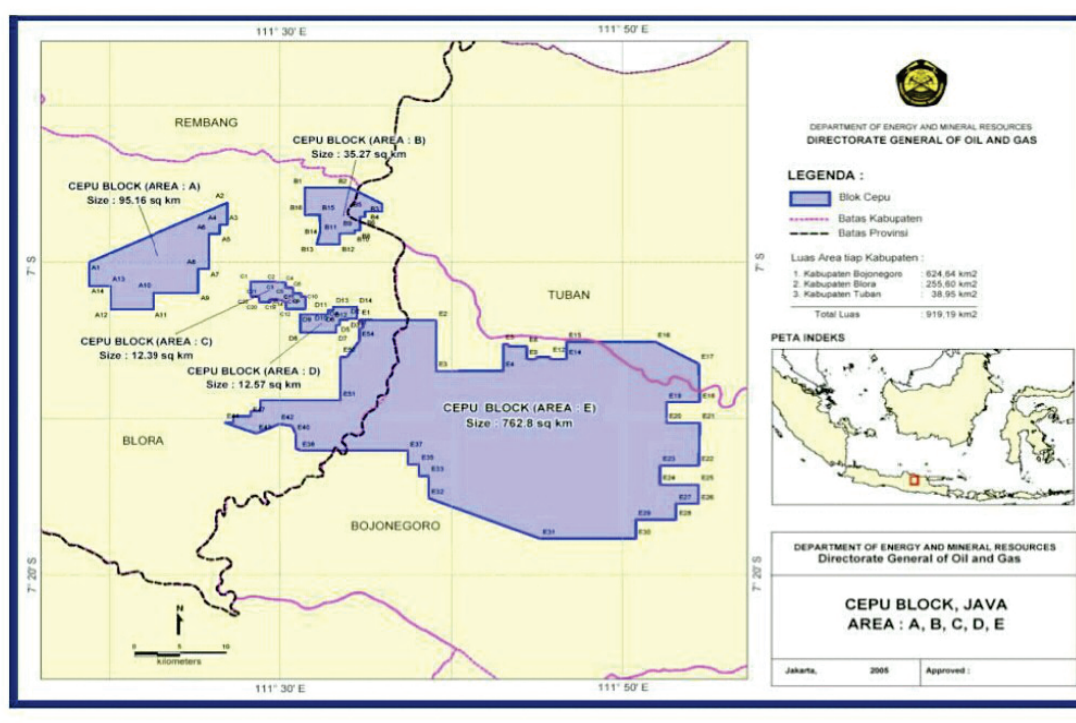

27 Oct, 18.00 – 21.00

Ramayana Ballet at Prambanan Temple

Overview of Fieldtrip Location

The fieldtrip of the third batch of training course “Improving the Governance of Extractive Industries” will take place in Bojonegoro regencies where one of five areas of Cepu Block lies on. The Cepu block is the largest on shore basin, which the large source of oil and gas is in East Java. It is currently exploited and divided into five field areas, which located in three regencies of Blora (Central Java), Bojonegoro, and Tuban (East Java). Among these five areas, four are drilled in Blora regency, two of shared-oil areas extracted in Tuban regency, and the biggest areas, Area E, lies across those three regencies. Please, see the detailed information below:

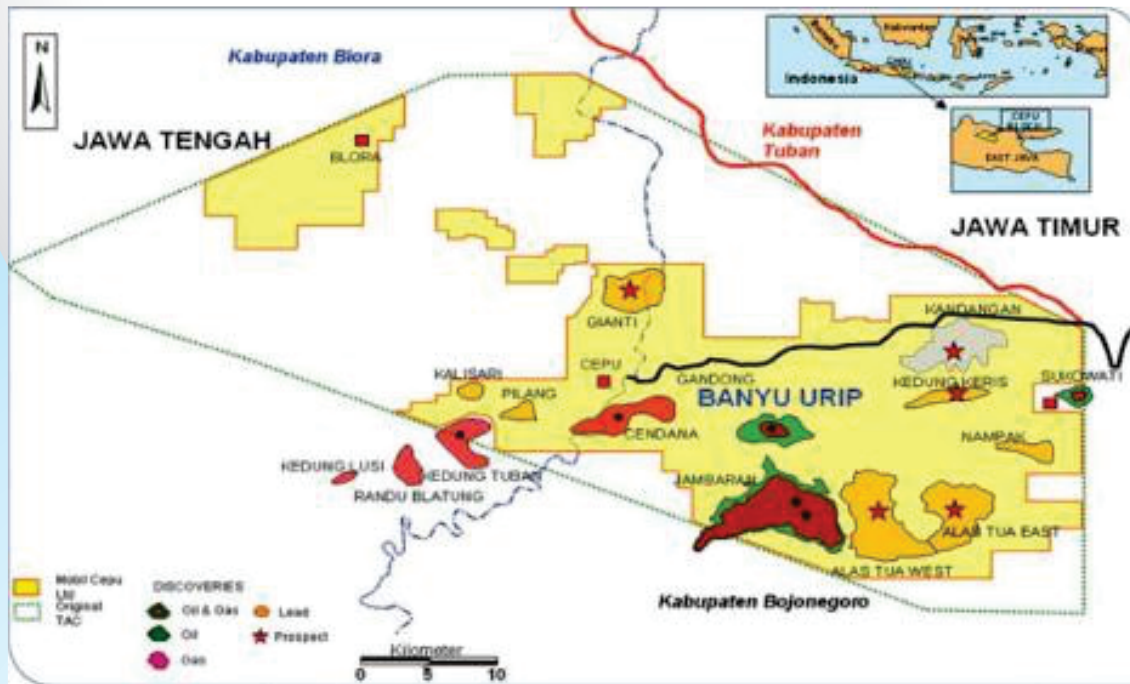

Areas of Cepu Block

Source: (Suryana & Bachriadi, 2012)

Previously, Cepu Block was considered a mature and over drilled block but after the discovery of The Banyu Urip oil field in 2001 by Mobil Cepu Ltd (MCL) in collaboration with Pertamina, a golden age of the old time has been reemerging in Bojonegoro regency. The Banyu Urip is estimated to contain more than 450 million barrels of oil. The prediction says that this Regency of Blora has oil and gas deposits in almost a half of its territory, so does the Blora and Tuban regencies.

Banyu Urip Oil Fields Map

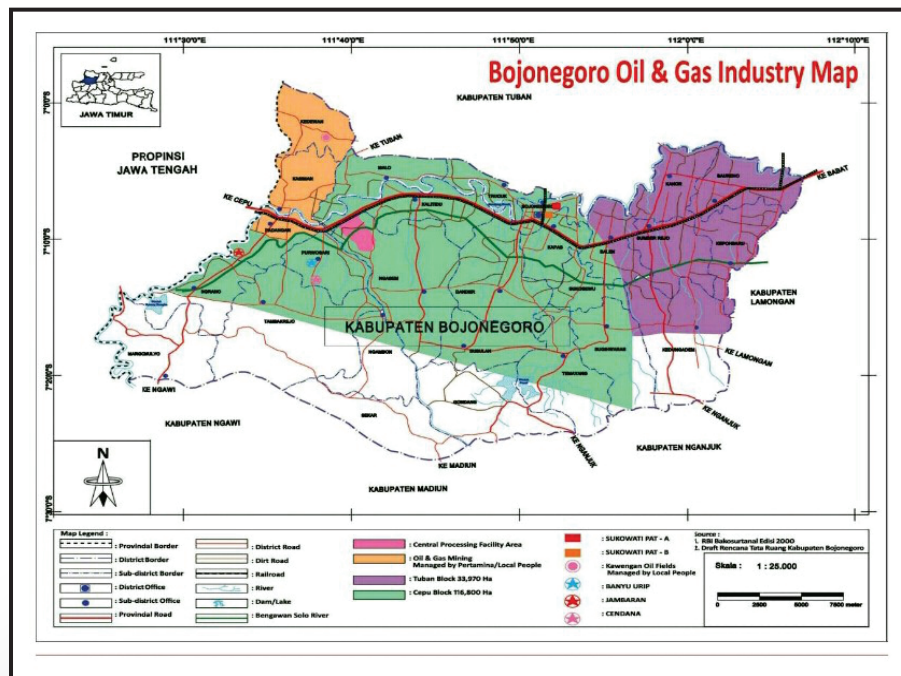

Source: (Suryana & Bachriadi, 2012)

In 2015, the Banyu Urip field is targeted to reach the peak of production (full production) which is around 165,000 barrels per day (bph). This is hoped to contribute around 20 percent for the oil-lifting target of the State's Budget 2015, which is 825,000 bph. This Oil production from the Banyu Urip field was boosted to raise 10,000 bph since last year due to the addition of the early production facility. Previously, the production was at 26,000 to 29,000 bph.

Cepu Block is developed under the Cepu Cooperative Contract (KKS) signed in 2005 for 30 years. Mobil Cepu Ltd (MCL) (Exxon), and Ampolex Cepu Pte Ltd (Exxon), Pertamina EP Cepu (Pertamina), PT Sarana Patra Hulu Cepu (Central Java), PT Asri Dharma Sejahtera (Bojonegoro), PT Blora Patragas Hulu (Blora), and PT Petrogas Jatim Utama Cendana (East Java) together comprise the Contractor under the Cepu KKS. A Joint Operating Agreement (JOA) was entered into by the Contractor parties, MCL (Exxon) serves as the operator of the Cepu KKS on behalf of the Contractor. In the meanwhile, Petrochina East Java serves as Joint Operation Body (JOB) of Pertamina in Cepu Block. At the sharing-scheme, the Exxon Mobil Corporation and Pertamina receive, each, 45% of the oil revenue while the rest 10% goes to the local governments.

Bojonegoro Regency Map

(Suryana & Bachriadi, 2012)

Bojonegoro is regency in East Java Province, about 110 km west of Surabaya, the capital city of East Java Province. This regency covers an area of 230,706 ha. Almost half, 40.15%, of this area is national forest. Another 32.58% of it is agriculture area while 19.42% is a dry land (Pemerintah Kabupaten Bojonegoro, 2013) (Statistic Bojonegoro Regional Office, 2013). Based on the statistic, this regency has population of 1,450,889 people with a very low growth around 0.38 in each year since 2000 (The Bojonegoro Bureau of Statistic (BPS), 2014)

Bojonegoro regency becomes widely known after the latest discovery of new oil claimed to have the biggest oil reserved. Due to this reason, this regency, together with Blora Regency, became pilot project on combating resource curse at the sub-national level, in collaboration with the Revenue Watch Institute and Open Society Institute's Local Government and Public Service Reform Initiative (LGI) since 2008 (World Bank, 2013).

Geography

Bojonegoro borders with the Tuban Regency to the north, where Bojonegoro's oil and gas pipelines run across, than Lamongan Regency to the east. To the south, Bojonegoro regency borders with the Regencies of Ngawi, Nganjuk, and Jombang and to the west with the Regencies of Ngawi and Blora of Central Java Province.

Politics and Government

With an area about doubled-size of Egypt, this regency is divided into 28 sub-districts and 419 villages. Each of village is headed and governed by the head of village. Since 2008, Mr. Suyoto as a regent, a politician from National Mandate Party (PAN), heads Bojonegoro Regency. He graduated from the Muhammadiyah University of Gresik. He was re-elected in 2013 with Setyo Hartono, who has military background as a lieutenant colonel, as the vice-Regent to serve the term until 2018.

Economics

Bojonegoro Regency has been attempting to further economics diversity in order to reduce its dependency on oil and gas revenue. The chart below shows that the Bojonegoro's economic growth with oil and gas fell sharply in the last five years. In the meanwhile, the economic growth without oil and gas has gradually increased surpassed Jatim and National growth.

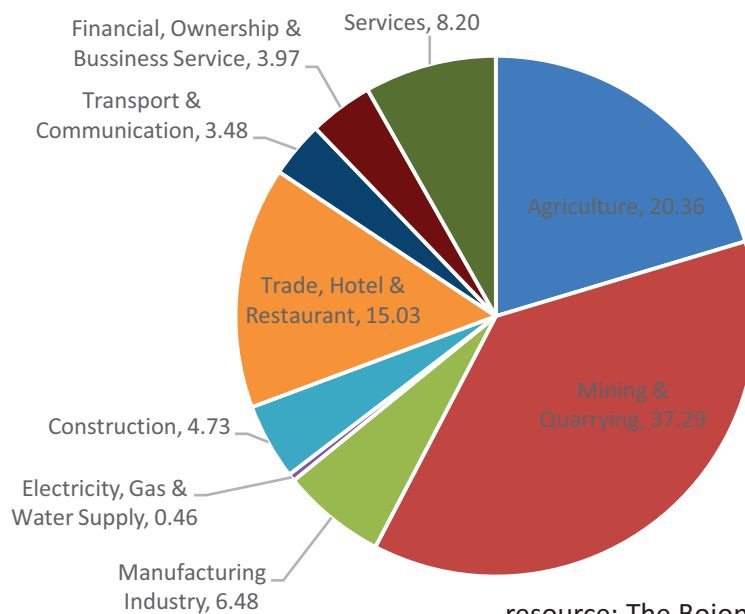

Bojonegoro's Economic Growth

resource: The Bojonegoro Regents' 2014 Accountability Report (LKPJ)

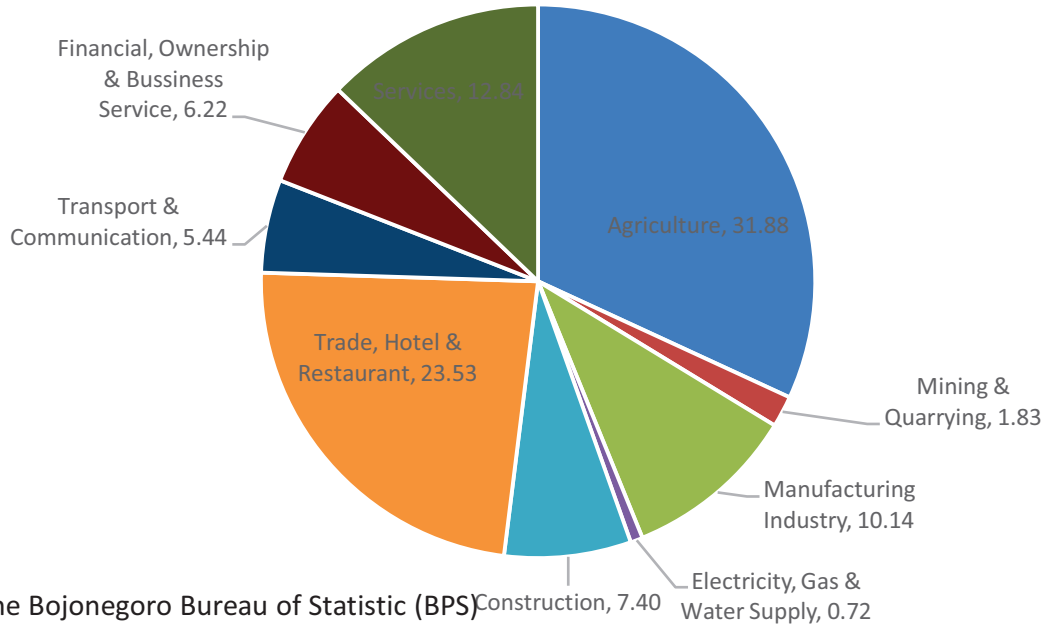

In addition, the dependency on oil and gas is showed in the next charts that oil and gas has contributed almost half of Gross Domestic Regional Bruto (GDRB) of Bojonegoro in 2014. Agriculture and commerce; hotel; and restorant services come as the next main sources of revenue consecutively.

Gross Domestic Regional Product (With Oil & Gas) in 2014

resource: The Bojonegoro Bureau of Statistic (BPS)

Gross Domestic Regional Product (Without Oil & Gas) in 2014

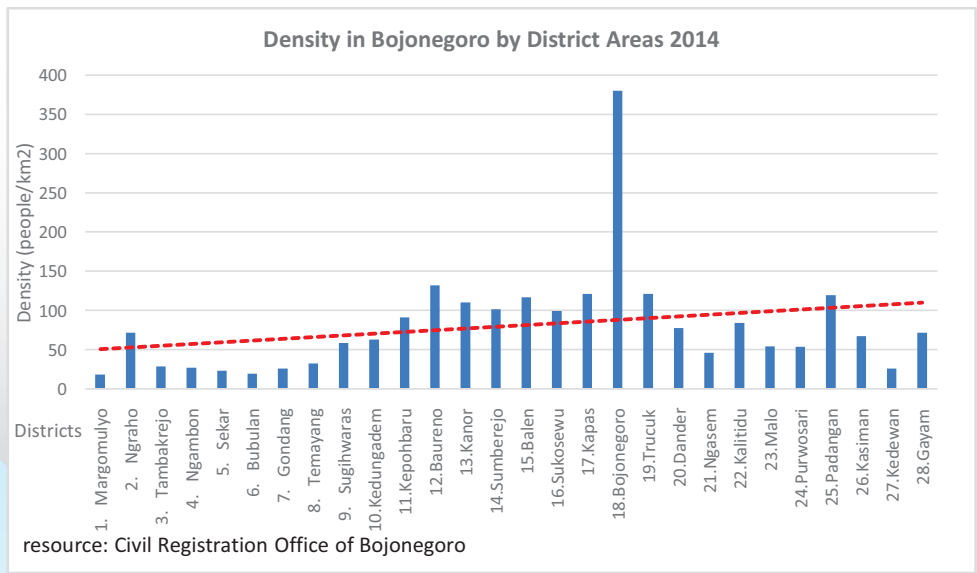

Before well-known as a resource-rich region, Bojonegoro was once know for its top quality tobacco, rice – paddy, and also teak. After oil field discovered, these kind of revenues become “complementary” compares to oil and gas revenues. In 2011, Bojonegoro's rice-paddy production reached 707,970,41 tons, then 14,509 tons for Virginia's tobaccos and 2,402 tons of Java's tobaccos. Unfortunately, a year after, the area of paddy's field was significantly decreased to almost half of its size in the 2011, from 147,464 Ha to 67,274 (Bojonegoro Local Government, 2013: 40-47).

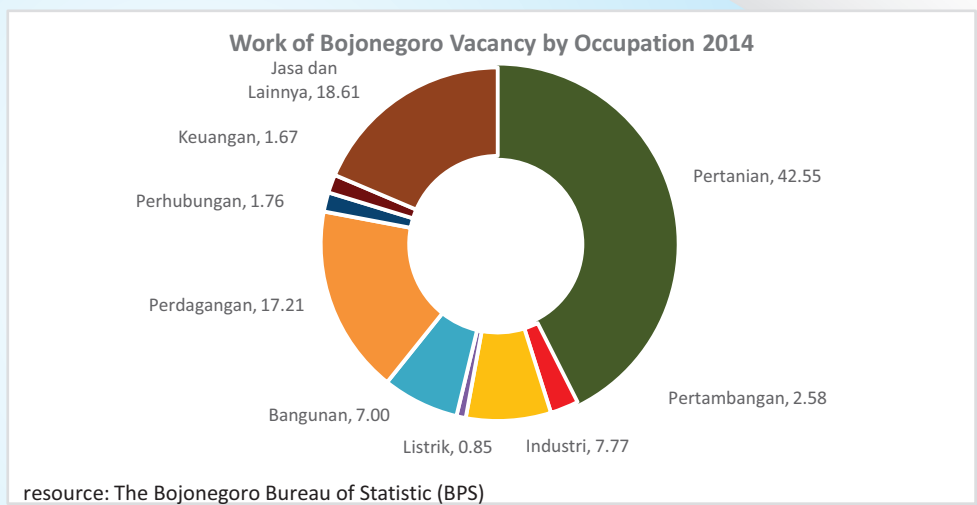

The discovery of oil and gas in this regency has brought major change. Oil and gas extractive industries become the biggest revenues contributor in national and also in local level. Bojonegoro has mostly cited as a Stock of National Energy with almost 20% of national energy coming from this region. With oil reserves in around 1.200 MMBOE and gas reserves up to 6 billion cubic feet in only one oil field, Banyu Urip, sub-district Ngasem, Bojonegoro has contributed Rp 1 trillion, with assumption of oil price in around \$90, to the State. This prediction can be even higher in peak production where the production may reach as high as 165,000 per barrel per day in 2015. Beside Banyu Urip oil field, there are also oil and gas field in Kedung Keris, Alas Tuo Timur and Tiung Biru. For such a detailed information of oil field map, please read “Oil Field Map”

Social

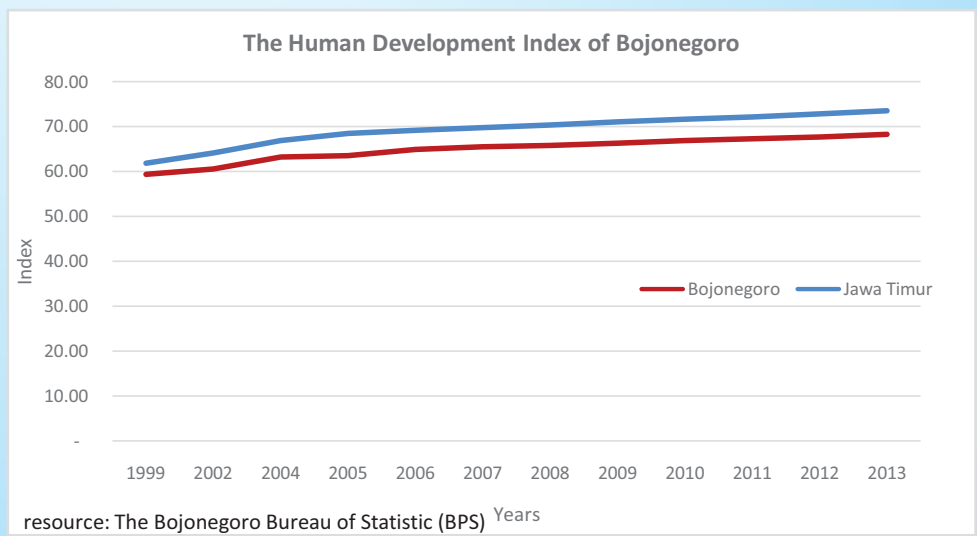

Among its 1,450,889 population, 81.23% resides in the rural areas that is comprised of 28 villages, and only 18.77% has lived in an urban area. Though only less than a quarter of its population resides in the urban area, that area is still becoming the most populated. One of the cause of this trend is the concentration of development of economic activities, such as hotels; restaurants; banks, take place mainly in the urban area. The chart below shows the pattern of density in Bojonegoro by district in 2014.

In the meanwhile, rural areas in Bojonegoro Regency is offering various vacancies from agriculture, trading, developers, financials and including in mining field. As the chart below, agricultural sector absorbs most of employees in Bojonegoro Regency.

However, the human development index of Bojonegoro Regency is only on average and almost low compares to another regencies and cities in East Java Provinces. The chart below shows the index.

Tuban: An Overview to Its Oil and Gas Industries

Tuban is a 1.904,70 km² Regency located on the North coast of Java, approximately 100 km west of Surabaya, capital of East Java. As one of the region in northern part of Java, Tuban holds a very important seaport to the Java's trading life since four hundred years ago, while its geological condition put Tuban lies between the Northern Java's basins that extend from Semarang in the west to Surabaya in the east. A regency of around one million inhabitants, the people depends its economic life on agricultural, fisheries, and tourism, as Tuban is well known of its "1000 caves" and home of several Islamic historical sites.

Mudi Oil Field Map

As one of the three regencies where the Cepu block lies, Tuban has the smallest exploration area for only 38,95 square km from the whole 624,64 square km. However, the seaport where all the oil and gas distribution and export from the CepuBlock start from is located in Tuban. In 2012, the seaport has exported 2.6 million barrels of oil with total worth of USD 304.67 (The Tuban Statistic Bureau). Two companies have contract to do the exploration in Tuban area, namely Pertamina EP (the state owned company) that operates in Banyu Urip field (Senori District), and the Joint Operating Body Pertamina-Petrochina East Java (JOB PPEJ) in Sumur Mudi (Soko district). It is easy to say that the oil and gas production in Tuban has been decreasing from its more than one million barrels production in 2007 to only around 600,000 barrels in 2012. Yet, in late 2013, JOB PPEJ found an oil and gas potential resource in Sumber Village, Merakurak District.

Based on the latest survey of Social Security Program (*Pendataan Program Perlindungan Sosial – PPLS 2011*), 147.847 families or 47% from the total number of families in Tuban, are under poverty rate. The highest number of poor families is in Soko Distric where is Joint Operating Body Pertamina-Petrochina East Java (JOB PPEJ) together with The Mobile Cepu Limited (MCL), as well as other couple of companies set this district as the CSR targeted area.

JOB PPEJ reveals that 62% from its total CSR funds (IDR 4.495.880.000 from total IDR 7.297.717.000) in 2011 is allocated for compensation to the impacted area, and 25% from total for the infrastructure development, while they were about to start the people's economic empowerment in 2012 starting with need assessment and several administrative training in managing the CSR funds for the local administration.

This high number of poverty later on brings problems in the development of extractive industries in Tuban that has been indicated by some disturbance on the site projects. Tuban does not receive the revenue sharing from the Block Cepu total production as part of the regency where the Block Cepu lies, because the production wells are located in Bojonegoro. So far, Tuban only receives revenue sharing from two blocks Tuban oil and gas fields operated by Pertamina PEP and the JOBP-PEJ. Tuban only receives a 6% of revenue sharing that shared among all regencies in East Java.

The City Tour

YOGYAKARTA (often also called Jogja, Yogya, Jogja or Jogjakarta) is located in middle of Java Island - Indonesia, where you can explore the pure beaches and thousand of years old ancient temples. The unique combination of ancient temples, history, traditions, culture, and the natural phenomenon make Yogyakarta worth to visit. As a famous archaeotourism destination, Yogyakarta is a paradise for exploring a thousand years old temples and finding the ruins of the "enigmatic missing civilizations".

Borobudur, the Biggest Buddhist Temple in the Ninth Century

Borobudur is the biggest Buddhist temple in the ninth century measuring 123 x 123 meters. It was completed centuries before Angkor Wat in Cambodia. This Buddhist temple has 1460 relief panels and 504 Buddha effigies in its complex. Millions of people are eager to visit this building as one of the World Wonder Heritages. It is not surprising since architecturally and functionally, as the place for Buddhists to say their prayer, Borobudur is attractive.

Borobudur was built by King Samaratunga, one of the kings of Old Mataram Kingdom, the descendant of Sailendra dynasty. Based on Kayumwungan inscription, an Indonesian named Hudaya Kandahjaya revealed that Borobudur was a place for praying that was completed to be built on 26 May 824, almost one hundred years from the time the construction was begun. The name of Borobudur, as some people say, means a mountain having terraces (budhara), while other says that Borobudur means monastery on the high place.

Prambanan, the Most Beautiful Hindu Temple in the World

Prambanan is the masterpiece of Hindu culture of the tenth century. The slim building soaring up to 47 meters makes its beautiful architecture incomparable. Prambanan temple is extraordinarily beautiful building constructed in the tenth century during the reigns of two kings namely Rakai Pikatan and Rakai Balitung. Soaring up to 47 meters (5 meters higher than Borobudur temple), the foundation of this temple has fulfilled the desire of the founder to show Hindu triumph in Java Island. This temple is located 17 kilometers from the city center, among an area that now functions as beautiful park.

Prambanan temple has three main temples in the primary yard, namely Vishnu, Brahma, and Shiva temples. Those three temples are symbols of Trimurti in Hindu belief. All of them face to the east. Each main temple has accompanying temple facing to the west, namely Nandini for Shiva, Angsa for Brahma, and Garuda for Vishnu. Besides, there are 2 flank temples, 4 kelir temples and 4 corner temples. In the second area, there are 224 temples.

There is a legend that Javanese people always tell about this temple. As the story tells, there was a man named Bandung Bondowoso who loved Roro Jonggrang. To refuse his love, Jonggrang asked Bondowoso to make her a temple with 1,000 statues only in one-night time. The request was nearly fulfilled when Jonggrang asked the villagers to pound rice and to set a fire in order to look like morning had broken. Feeling to be cheated, Bondowoso who only completed 999 statues cursed Jonggrang to be the thousandth statue.

YOGYAKARTA PALACE (KRATON) : A Living Museum of Javanese Culture and the Place Where the King of Jogja Lives

Kraton or the Palace where Sultan and his family of Yogyakarta live is located in the center of the axis stretching from the north to the south, and in the secondary axis from the east to the west. It is encircled by row of the mountains called the Horizon as the border of the universe.

Keraton Kasultanan Ngayogyakarta Hadiningrat or now better known by the name of Yogyakarta Palace is the center of Javanese culture living museum that is in the Special Region Yogyakarta (Daerah Istimewa Yogyakarta). Not just becomes the place to live for the king and his family, the palace is also a main direction of cultural development of Java, as well as the flame guard of the culture.

At this place tourists can learn and see directly on how the Javanese culture continues to live and be preserved. Yogyakarta Palace was built by Pangeran Mangkubumi (Prince Mangkubumi) in 1755, several months after the signing of the Perjanjian Giyanti (the Agreement Giyanti). Banyan forest (Hutan Beringin) was chosen as the place for building the palace because the land was between two rivers that were considered good and protected from possible flooding. Although already hundreds of years old and were damaged by the massive earthquake in 1867, Yogyakarta Palace buildings still stand firmly and well maintained.

Malioboro Street

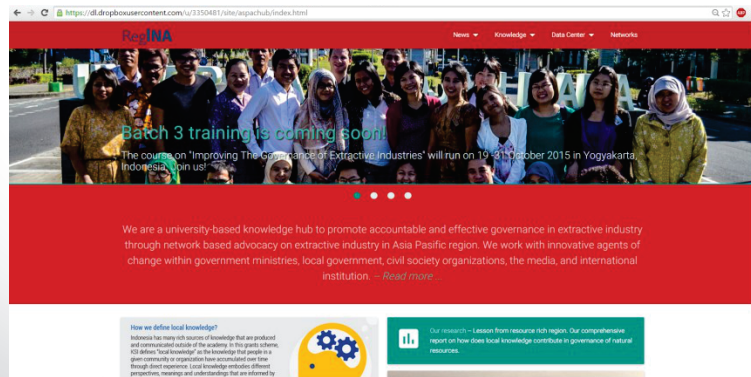

Without a doubt one of the most well-recognized and most visited tourism sites in Yogyakarta, Jalan Malioboro is famous for its seemingly unending collection of shops, stores, dining spots, and all sorts of shopping venues of all kinds where you can find many things to select and purchase for your convenience. Perfect if you are looking for gifts or a bit of Yogya-style memorabilia to remember your journey here!
